

Easy Christmas Baubles with stamped detail

I love making easy Christmas decorations using my crafting supplies. And nothing beats the feeling when you can get your nieces and nephews together to help. This year I chose red and green with a touch of aqua and the end results are simply stunning and vibrant.

1. Punch 3" Circles out of smooth white cardstock. Stamp pine leaves onto each circle at the top alternating between your 3 colors of inks chosen.

2. Match up your Versafine Clair ink that you stamped in with a Versamagic ink and blend some color over the background.

3. Use a bone folder and a scoring board if you have one to score the circles in half. You can also use a ruler.

4. Add some Tear it tape to each half of the circle either side of the scored line - on the back of the stamped circle.

5. Adhere two circles together as per the sample. Continue until you have adhered about 7 circles together.

6. Before you adhere the last circles together to close the bauble, slip some ribbon inside and adhere using adhesive. Make a loop to hang at the top of your ribbon. Tie a knot at the bottom and top - you can add beads and other decorative elements as desired. And your baubles are ready to hang.
