

## Easy Watercolour swipes on a card

I love the look of water colours. I have a few stamps with beautiful swish marks but sometimes I need them to be bigger and more substantial, so I used my ink pads for that. And in a few minutes you have a gorgeous simplistic background that looks really artistic.

1. Use Memento Lux ink pads to create swipes across a white cardstock panel. Make sure you start off the edge.

2. Add a darken shade of green using VersaFine Clair by lightly swiping it across the bottom edge.

3. Splatter the background using the nozzle of the bottle of Sheer Shimmer. Leave to dry.

4. Stamp a sentiment on the right hand side running upwards using VersaFine Clair ink. Add diamanté to finish off your card.
