

Layered Hunter green background over embossing

I am not normally a fan of green, but layered together with some shimmer this colour is a real neutral gem. Use it for Thanks Giving and Christmas or all through the year celebrating mother nature.

1. Onto smooth white cardstock stamp several leaves from the Joy Clair stamp set using Versamark.

2. Sprinkle with Mboss Jade Pearl embossing powder, shake off excess and heat set. Return excess powder to the bag.

3. Blend different shades of green ink over the entire background. I used Memento Luxe and a jumbo dauber.

4. Blend a layer of Northern Pine Memento Luxe ink over the background. Use damp cloth to wipe clean the embossed leaves. Spray the background with Silver Shimmer Spray and leave to dry.

5. Stamp a sentiment onto white cardstock scrap and tear the one edge. Adhere and finish off your card with some diamanté.
